

Conceptual Subscription Model

Overview

The conceptual subscription model was designed as part of the initial TalentForge platform vision to provide recruiters with tiered access to talent search and candidate engagement features. This model aimed to create value for both recruiters and job seekers while introducing a potential revenue stream for the platform.

Subscription Tiers

1. Free Plan

- **Primary Access Method:** Recruiters can view candidate profiles only if the job seekers have applied to a job they posted.
- **Key Features:**
 - Post job listings
 - View and manage applications from interested job seekers
- **Limitations:**
 - No access to the full TalentForge talent pool
 - No advanced search capabilities
 - Limited or no visibility of passive candidates who may not have applied directly.

2. Premium Plan

- **Primary Access Method:** Recruiters gain unrestricted access to the entire TalentForge talent pool, enabling proactive candidate outreach.
- **Key Features:**
 - Full access to all registered job seeker profiles, regardless of application status.
 - Advanced search functionality to filter candidates based on multiple criteria (e.g., skills, years of experience, location, job type)
 - Ability to directly contact potential candidates without posting a job
 - Priority filtering of candidates for higher matching probability
- **Value Proposition:**
 - Significantly reduces time-to-hire by allowing recruiters to search for and approach candidates directly.
 - Expands reach beyond active applicants to include passive job seekers.

Rationale

This subscription model was intended to balance accessibility with monetization:

- Free tier ensures ongoing engagement from smaller employers and startups.
- Premium tier offers a competitive advantage to recruiters who require faster and more targeted hiring processes.
