

Multi-Factor Authenticator (MFA) Signup Procedure

Effective Date: July 30, 2025

Owner: Chief Information Officer

Version: 1.0

Applies To: All TalentForge user accounts (Job Seekers and Recruiters)

1. Purpose

This procedure outlines the steps required to activate Multi-Factor Authentication (MFA) for all users on TalentForge. MFA is required to enhance account security and comply with our Privacy & Cookies Policy.

2. Scope

This procedure applies to all registered users of TalentForge, including:

- Job Seekers
- Recruiters

3. Procedure

All users must set up Multi-Factor Authentication using a compatible authenticator app to complete the login process.

Steps for MFA Setup

1. Register Your Account

- Create a new user account on TalentForge (as a job seeker or recruiter).
- MFA is mandatory for all users.

2. Initiate MFA Setup

- After completing the initial registration, users will be **partially logged in** and prompted to configure MFA.
- Download an authenticator application if not already installed (e.g., **Google Authenticator** or **Microsoft Authenticator**) from:
 - Google Play Store (for Android users)
 - Apple App Store (for iOS users)

3. Scan the QR Code

- On the TalentForge screen, scan the displayed QR code using the authenticator app.

4. Enter the Verification Code

- After scanning the QR code, the authenticator app will display a one-time passcode.
- Enter this code on TalentForge to complete the MFA setup and fully log in.

4. Exceptions

There are **no exceptions** to this procedure. All users must set up and use an authenticator application to log in to TalentForge.

5. Parent Policy
